

## **FALL 2020: Online Enrichment Programs for K-8**

***Make something great and re-start the joy of learning!***

To meet the needs of these challenging times for elementary and middle-school students, we have created a virtual enrichment program offering the same hands-on programs for students in grades K-8. These include classes like Ukulele and Woodworking as well as Comics and Cartooning and an Introduction to Minecraft Redstone. All of these classes start in October and are currently open for registration.
